

ELECTRICAL TRAINING COURSES

Basic Electrical Awareness Training (One Day Course)

Delivered at your location anywhere throughout the UK

The Basic Electrical Awareness Training Course is a general course appropriate for a wide range of people who need to carry out some form of electrical work. The work could involve electrical assembly, simple fault finding or any activity where an improved understanding of electrical systems would be beneficial

Typical Participants: Any person who needs a greater understanding of electricity, electrical systems, dangers and safe working practices

General Information: This course will be customised to your requirements and will relate to the type of activities that people need to carry out. The course attendees will be assessed upon completion of the course so that you can be assured that they have learnt. The course will be certificated as 'Successful Completion' and will therefore be invaluable for health and safety purposes.

Typical Content:

- Electrical Quantities and Units
- Simple Electrical Circuits - how they work
- Electrical Supplies (DC, Single and Three Phase)
- Electrical Circuit Protection Methods (Earthing, MCBs, Fuses, RCDs)
- Typical Electrical Hazards and Safe Working Practices
- Common Electrical Problems - their symptoms, causes and remedies
- Understanding energy demands and electrical power consumption
- Electricity and the Law - An overview of regulations currently in force.

Course costs are dependent on your location and the number of attendees.

Tinson Training delivers courses to a wide selection of UK businesses, delivered on site and customised to ensure that it meets the exact needs of the attendees.
